

# SPOUD

You want a job? Then look elsewhere, because we are looking for...

## pioneers, explorers and pirates

**Do you want to play a key role in building a revolutionary new product that helps the biggest Swiss enterprises to achieve the data literacy of Amazon?** Our product, the SPOUD Data-Market is redefining the way enterprises are able to access and integrate business data inside and share it between companies. To do this we leverage the power of event-processing technologies, artificial intelligence and (in contrast to industry standard) amazingly beautiful and sexy user interfaces and visualisations.

We are passionate people with an intuitive unwillingness to accept needless boundaries. Urge to create, maker nature, proud of things built, love for everything growing and living. That's us. SPOUD. We are a family of pioneers, explorers and pirates in the area of enterprise big-data.

We are at the forefront of big data innovation in Switzerland, so if you are fascinated by the amazing potential of data you are in the right place. Specifically, we are looking for:

## DevOps Engineer (80-100%)

There is huge diversity of work waiting for you in the area of software engineering, data engineering, architecture and DevOps. You will be able to work either for our product or for our analytics and integration projects (latter call themselves Data-Ninjas :)

### Your role...

- You will have a vital responsibility for operating and maintaining our fancy-pants distributed event-processing environment
- This will involve cluster management, job scheduling, CI/CD in the cloud and on-premise (future)
- You will help to identify and create new features for smooth operation of our product
- As a DevOps Engineer you will participate in software development and product development
- You will be involved in customer support

### Your profile...

- 2 years of experience in operating and maintaining Linux servers
- Eager to develop own tools to improve productivity and ability to write clean code
- Experience with cloud providers and container virtualization (docker, nomad, kubernetes, marathon)
- An awareness of what is meant by "lean start-up" and "design thinking"
- Bonus: Experience with Kafka, Flink, NodeJS, Consul and Java (because others will talk about it often..)

### We offer...

- A diversity of challenging problems and unsolved questions on the technological front and the freedom to solve them in your own way
- A team of experienced start-up enthusiasts who will help you get ahead and will also listen to you
- A young, dynamic, and non-bureaucratic environment with a lot of flexibility
  - An inspiring workplace with a fantastic team of creative people in the heart of Bern or part-time in Zürich

Attention: This is not a job. It is a mission where you play an active role in your own journey and tap into a world of potential for your future.

So save your seat on this fast-growing rocket ship and be at the Swiss forefront of Innovation in big data! The SPOUDies look forward to welcome you to their family (regular BBQs are a must!)
