

# SPOUD

## You want a job? Then look elsewhere, because we are offering you a mission...

Our product — the SPOUD Data Market — is redefining the way enterprises are able to access and integrate business data within and beyond their borders. Be the driving power that gets our crazy integration and analytics projects off the ground.

We are passionate people with an urge to create, who are proud of things built, and have a love for everything growing and living. We are a family of pioneers, explorers, and city-builders in the area of enterprise Big Data.

We are looking for a:

## Software / Data Engineer (100%)

There is huge diversity of work waiting for you in the areas of software and data engineering. Come join our team and work on our analytics and integration projects!

### Your Role

- You will play a fundamental role in our software engineering team and guide architecture and design decisions
- You will be responsible for building and maintaining data processing pipelines, both at scale and in productive systems
- You will work in an interdisciplinary team together with data scientists, designers, engineers and business people
- You will be responsible for communicating technical results to the team and customers

### Your Profile

- 2+ years of relevant experience in software development and the ability to write clean, scalable code in Java or Python
- Working knowledge with state-of-the-art development frameworks, tools, and methods in software and data engineering
- You enjoy working in a start-up environment but also feel comfortable working with customers in the enterprise world

#### Nice to have and experience in:

- Streaming technologies such as Kafka and Flink or a willingness to learn them
- Operations, i.e. familiarity with managing cloud platforms, automation, and CI/CD
- Data analytics, i.e. an understanding of the fundamentals and familiarity with pandas, numpy, matplotlib, and scikit-learn.
- Elasticsearch and working with unstructured data at scale

### We Offer

- A place where you can be happy if you like making a difference!
- A diversity of unsolved questions on the technological front and the freedom to solve them in your own way
- A team of experienced start-up enthusiasts who will help you get ahead and will also listen to you
- A young, dynamic, and non-bureaucratic environment with a lot of flexibility
- An inspiring workplace with a fantastic team of creative people in the heart of Bern

**Attention:** This is not a regular job – this is a mission where you play an active role, help our customers build their data nirvana and on this path unfold your full potential.

So save your seat on this fast-growing rocket ship and be at the Swiss forefront of Innovation in big data! We are looking forward to welcome you to our family (regular BBQs are a must!).

Send us your application (CV and motivational letter) in PDF and  
**let's have a coffee together: [jobs@spoud.io](mailto:jobs@spoud.io)**
