

# SPOUD

You want a job? Then look elsewhere, because we are looking for...

## artisans, city-builders, explorers and pirates

**Do you want to play a key role in integrating and building our revolutionary new product that helps the biggest Swiss enterprises to achieve the data literacy of Amazon?** Our product, the SPOUD Data-Market is redefining the way enterprises are able to access and integrate business data inside and share it between companies. To do this we leverage the power of event- processing technologies, artificial intelligence and (in contrast to industry standard) amazingly beautiful and sexy user interfaces and visualisations. Be the driving power that gets our crazy integrations and analytics projects off the ground.

We are passionate people with an unwillingness to accept needless boundaries. We have an urge to create, a maker nature, are proud of things built, and a love for everything growing and living. That's us. SPOUD. We are a family of pioneers, explorers and city-builders in the area of enterprise big-data.

We are at the forefront of big data innovation in Switzerland, so if you are fascinated by the amazing potential of data, you are in the right place. Specifically, we are looking for a:

## Senior Full Stack Developer/ Engineer (100%)

There is huge diversity of work waiting for you in the area of software engineering, data engineering, architecture and DevOps. You will be able to either work for our product or for our analytics and integration projects – come join our Data-Ninjas team ;)

### Your role...

- You will be a fundamental part of our software engineering Data-Ninja or product development SDM Team
- You will work in an interdisciplinary team together with data scientists, designers, engineers and business people
- You will participate in software architecture and design
- You see the entrepreneurial vision of SPOUD and align your doings accordingly

### Your profile...

- Experience in Software Development and the ability to write clean code
- Familiar with Software Design and Architecture
- Know-how in state-of-the-art development frameworks, tools, and methods in your field of expertise
- Experience with Java, Go, Kafka, Flink, Docker, JavaScript, Rx and Angular
- You like to work in a start-up environment but you feel comfortable also in the enterprise world

### We offer...

- A diversity of unsolved questions on the technological front and the freedom to solve them in your own way
- A team of experienced start-up enthusiasts who will help you get ahead and will also listen to you
- A young, dynamic, and non-bureaucratic environment with a lot of flexibility
- An inspiring workplace with a fantastic team of creative people in the heart of Bern

Attention: This is not a regular job – this is a mission where you can play an active role, help our customers build their data nirvana or help our SDM Team to build our product and get the chance to unfold your full potential.

So save your seat on this fast-growing rocket ship and be at the Swiss forefront of Innovation in big data! The SPOUDies look forward to welcome you to their family (regular BBQs are a must!).

Send us your application in PDF and let's have a coffee together: [jobs@spoud.io](mailto:jobs@spoud.io)
