

Do you know the **difference between a job and a mission?** Then you are at the right place, because we have a startup-mission for you!

## SPOUD is looking for a **Hacker & Consultant** 80-100%

Play a key role in our data-driven projects to solve the most pressing data challenges of our customers!

We are a team of passionate people with an urge to create and the intention to make a difference. We are the owners of [www.spoud.io](http://www.spoud.io) and [www.agoora.com](http://www.agoora.com). We value curiosity, challengers, open communication and kindness before ego. We love to work together and appreciate all opportunities to drink a beer together and talk about the world and it's challenges.

Sign-up for your own startup-mission inside of the SPOUD family by writing us on [mission@spoud.io](mailto:mission@spoud.io).

### Your Role

- ✓ You help solving customer challenges in the domain of data architectures and event-driven use-cases
- ✓ You are an all-rounder who loves to change between hacking, architecture and consulting
- ✓ Depending on the project and phase you work alone or lead small teams
- ✓ You like to hear about customer challenges and have a natural ambition to solve them. The bigger the challenge, the better the opportunity of creating something awesome
- ✓ You like to come up with solution approaches and feel passionate to present them to your audience

### We Offer

- ✓ A young, dynamic, and non-bureaucratic environment with a lot of flexibility (Yes! We support home office and flexible working hours)
- ✓ An environment to learn and to evolve
- ✓ An inspiring workplace in the heart of Bern
- ✓ We play ping-pong and table soccer and of course we have our self-branded beer

### Your Profile

- ✓ You are a doer and approach technical and organisational challenges proactively
- ✓ You like to share your opinions on technologies and architectures, their pros and cons
- ✓ You have 5+ years of relevant experience and the ability to define and present architecture and write clean code
- ✓ You see value in Java, Python, Angular, React, Docker and Kubernetes
- ✓ Experience in data architectures in general and event-driven-architecture as a focus
- ✓ You like to lead, you feel comfortable to moderate talks and like incremental feedback loops and learn by data
- ✓ You speak german and english fluently

Please do not contact us if you are a recruiter or an agency, we only accept direct applications. Thx.
