Do you know the **difference between a job and a mission?** Then you are at the right place, because we have a startup-mission for you!

SPOUD is looking for a
Software Engineer
80-100%

Play a key role in our data-driven projects to solve the most pressing data challenges of our customers!

SPOUD

We are a team of passionate people with an urge to create and the intention to make a difference. We are the owners of www.spoud.io and www.agoora.com. We value curiosity, challengers, open communication and kindness before ego. We love to work together and appreciate all opportunities to drink a beer together and talk about the world and it's challenges.

Sign-up for your own startup-mission inside of the SPOUD family by writing us on mission@spoud.io.

Your Role

✓ You will be responsible to create effective software and architecture with the goal to help our customer

✓ You will be responsible to collaborate with our customers
